Purchase Guide

Subscription overview

Alibaba Cloud Mobile Security service offers two editions: Free Trial and Professional.

Generally, the Free Trial Edition is a free service that only supports fundamental vulnerability scans and limited app hardening. The Professional Edition is a paid service that can further assist in the locating of vulnerabilities and supports more diverse hardening approaches.

Refer to the following table to determine which edition is more suitable for your requirements.

Service type	Free Trial Edition	Professional Edition
Vulnerability scan	Displays: <ul style="list-style-type: none">- Vulnerability type, quantity, level, and remedial advice.	Displays: <ul style="list-style-type: none">- Vulnerability type, quantity, level, and remedial advice.- Detailed descriptions of vulnerability locations.
App hardening	Supports: <ul style="list-style-type: none">- Anti-static analysis tool- DEX shelling	Supports: <ul style="list-style-type: none">- Anti-static analysis tool- DEX shelling- SO shelling- Constant encryption- Java execution simulation- Java command translation

Purchase an instance

After purchasing a Mobile Security instance, you can upgrade the service to the professional edition. Refer to the differences between the free trial and professional edition to determine which is more suitable for your requirements.

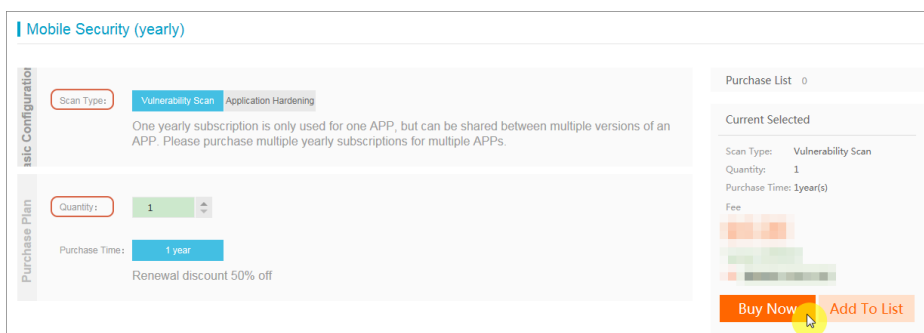

Procedure

Log on to the Alibaba Cloud console.

Click **Mobile Security** service under **Security**.

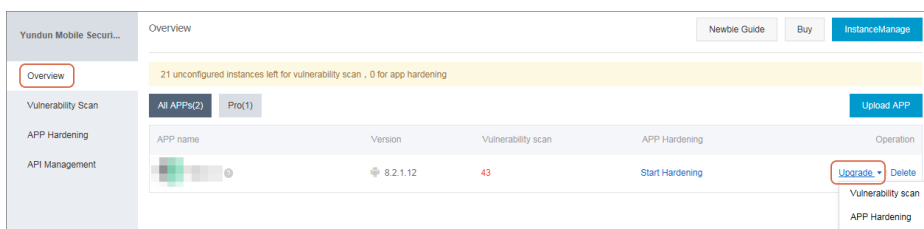

Click **Buy** at the top of the **Overview** page.

Select **Scan Type** and **Quantity**, and click **Buy Now** to generate an order. If more than one service is required, click **Add To List** per selection, and click **Batch Purchase** under the **Purchase List** to generate a combined order.

Confirm your order and complete the payment.

Go back to the Mobile Security console, select the app to be upgraded, and assign the purchased instance to it.

Renew an instance

Log on to the Alibaba Cloud console.

Click **Mobile Security** service under **Security**.

Click **InstanceManage** at the top of the **Overview** page.

Click **Renewal** under the instance to be renewed to generate an order.

Instance name	Payment type (all) ▾	Product type	APP package name	Date purchased	Expiration date/Remaining times	Operation
mobsec_yr_intl-ro84k072fe wa	Yearly subscription purchase	Vulnerability Scan Pro	<div><div></div></div>	2016-07-05 14:43:25	363 days left	Renewal
mobsec_yr_intl-xnpye8fanq od	Yearly subscription purchase	APP Hardening Pro	<div><div></div></div>	2016-07-07 14:52:54	365 days left	Renewal

Confirm your order and complete the payment.
