

# Machine Learning Platform for AI

Quick Start

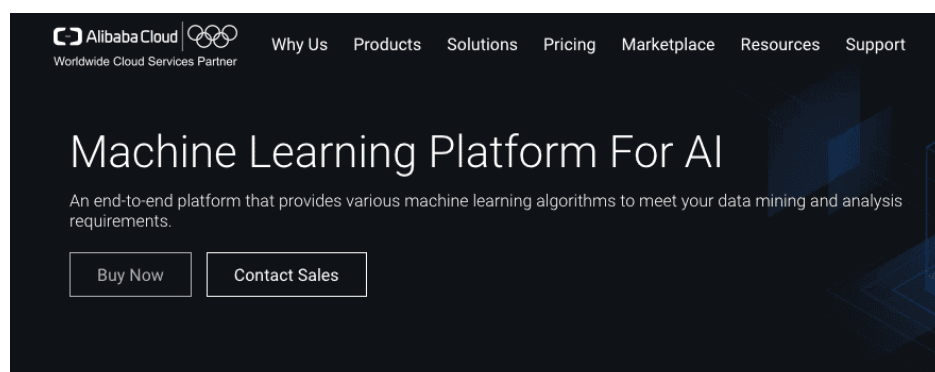

# Quick Start

## Prepare

Please follow the instructions below to create a Machine Learning project.

## Procedure

Log on to the Alibaba Cloud console to go to the **Machine Learning Platform for AI** page, and click **Buy Now**.

ALL PRODUCTS

 Machine Learning

Choose a region, and click **Buy Now**.

**Machine Learning**

Region	China North 2 (Beijing)	China East 2 (Shanghai)	China South 1 (Shenzhen)	Asia Pacific SE 1 (Singapore)	Asia Pacific SE 3 (Kuala Lumpur)	Asia Pacific SE 5 (Jakarta)
Version	V2.0					
Machine Learning	Machine Learning Algorithms					
Category	Algorithm Modules					Price
data_manipulation	Preprocessing Tools, Feature Engineering					0.16USD/hour*task
data_analysis	Statistic Analysis, Machine Learning, Time Series, Graph Algorithm, Financial Algorithm					0.21USD/hour*task
text_analysis	Text Analysis					0.27USD/hour*task

**Current Selected**

Region: Asia Pacific SE 1 (Singapore)

Version: V2.0

Machine Learning Algorithms

Fee: **\$0.00** / hour(s)

**Buy Now**

Go to the console, follow the note below and click **Go to DataWorks**.

**Project Management** China North 2 (Beijing) **China East 2 (Shanghai)** China South 1 (Shenzhen) Asia Pacific SE 3 (Kuala Lumpur) Refresh Create Project

No projects found in this region. Please create a project in DataWorks first. (Primary accounts only)

[Go to DataWorks](#)

**Follow these steps**

If you have already enabled this feature, please [Refresh](#)

For more information, click [Here](#)

Click **Create Project**.

**Overview Project List**

China South 1 Hong Kong US West 1 Asia Pacific SE 1 EU Central 1 Asia Pacific SE 2 Asia Pacific SE 3 Create Project Refresh

Select **MaxCompute** and **Machine learningPAI**, choose **Pay-As-You-Go**, and click **Next step**.

Create Project

×

Choose Calculation Engine Services

☒  **MaxCompute** ☒ Pay-As-You-Go ☐ Subscription [Go buy](#)

After opening, you can develop MaxCompute SQL, MaxCompute MR tasks in DataWorks.

☒  **Machine learningPAI** ☒ Pay-As-You-Go

After opening, you can use machine learning algorithms, deep learning frameworks, and online forecasting services. PAI using machine learning, you need to use MaxCompute

Choose DataWorks service

☐  **Data Integration**

After opening, you can develop data integration tasks in DataWorks and quickly implement data synchronization among more than 20 data sources.

☒  **Data Development, O&M Center, Data Management**

You can schedule workflows, schedule tasks, query information and permissions for all tables, and services are currently in open beta.

cancel

Next step

Configure basic information and advanced settings for the new project, and click **create**.
