

MindAccess IoT Value Plan Product Sheet

Document Version: v1.8 (October 2021), PRC

1. Introduction

MindAccess IoT Value Plan provides you with an Account to your own resources on MindSphere.

Store data, configure assets, users and rules and use MindSphere applications from the Store, for your end use or for the purpose of providing a service or application to others.

1.1. Prerequisites

Item	Description
Web browser	A HTML5 capable Internet browser is required (e.g. Mozilla
	Firefox, Google Chrome or Microsoft Internet Explorer). The
	recommended screen resolution is 1024x768 or higher.
Internet connection	The bandwidth of your Internet connection will determine your
	experience of the performance of the Services.
Data import	Import data to your Account through use of our designated
	MindSphere APIs. This can be done e.g. by using MindConnect
	Nano from Siemens or agents from third parties.

v1.8 (Oct. 21) Page 2 of 10

2. MindAccess IoT Value Plan

Item	Description
Access to your Account	MindAccess IoT Value Plan provides you with a dedicated
	Account on MindSphere. You can log in into your Account via the
	respective URL provided by us.
General	Different sizes of MindAccess IoT Value Plan are available
	(Small/Medium/Large). You are only authorized to utilize the Plan
	size to which you hold a valid subscription.

2.1. MindAccess IoT Value Plan - Size Overview

Item		Size	
	Small	Medium	Large
Productive tenant	V	V	√ V
Operations Insight	V	V	$\sqrt{}$
Fleet Manager	V	V	√
Cross-Tenancy ¹	√	√	√
Each shared asset via Cross-Tenancy leads to one used asset instance for the receiving tenant.			

2.2. MindAccess IoT Value Plan - Authorized Limits

Should the actual usage of your Plan size repeatedly exceed one or more of the applicable limits below (e.g. the number of Users for your Plan size), and should you not order the appropriate increase of usage capacities for an additional fee, we reserve the right to suspend the Service. Other contractual rights and remedies remain unaffected.

Item	Size		
	Small	Medium	Large
Users	50	150	500
Subtenants	10	40	80
Asset types	5	20	100
Asset instances	50	500	2 000
Operations Insight / Fleet Manager: Rules ¹	10	50	250
Operations Insight: simple	5	5	5

v1.8 (Oct. 21) Page 3 of 10

KPIs ²			
Operations Insight: Creators of	1	1	1
dashboards & KPIs³			
Connected Agents ⁴	10	25	100
Time series data ingest rate ⁵	2 KB/s	10 KB/s	100 KB/s
Time series data storage volume	60 GB	300 GB	3 TB
File storage	50 GB	100 GB	500 GB

¹⁾ Active concurrent. Further limits apply as set out in the MindSphere Supplemental Terms; ²⁾ Number of active concurrent KPIs, calculated every minute; ³⁾ Number of Users that have been assigned "Creator" role in user rights to be able to create dashboards and KPIs; ⁴⁾ Each connected Agent leads to one used asset instance; ⁵⁾ Data ingest is based on number of assets, number of variables per asset, size per variable, read cycle interval, sending frequency and overhead. Example: The 10 KB/s of a Medium Plan size could be reached by 200 assets with 10 variables, each sending frequency 10s, 20 assets with 100 variables, each sending frequency 10s. Underlying assumptions: 50 Bytes per variable including transport layer overhead – data type float as provided by MindConnect Nano and IoT2040; read cycle equals sending frequency.

3. Tools and other Services as part of MindAccess IoT Value

Plan

Item	Description
General	The following administration tools are available on your
	MindSphere Launchpad:
	Usage Transparency
	Settings
	Asset Manager
	Agent Diagnostic
	Upgrade
Usage Transparency	Usage Transparency provides information regarding your
	consumption of certain resources and corresponding limits of
	your MindAccess IoT Value Plan and other subscribed Services,
	e.g.
	Number of Users
	Inbound traffic
	Data storage volume
Settings	Settings allow managing Users, permissions, rights, roles,
	groups, Collaborations, subtenants and tenant provider
	information.
	For every User, an individual login is required.
	Users are also permitted to access and utilize the user
	management for the purpose of receiving a service from you.
	However, a user that receives a service from you shall not be
	granted with administration rights, except for administration
	rights that are offered by the user management of a subtenant.
	See also "Specific Terms for MindAccess IoT Value Plan" if you
	want to use the MindAccess IoT Value Plan for the purpose of
	providing MindSphere-based services to others.
Asset Manager	Use Asset Manager to:
	Onboard & offboard Agents to your Account.
	Configure assets, asset types and aspect types.

v1.8 (Oct. 21) Page 5 of 10

	Manage the Sharing of assets under a Collaboration between
	Accounts using Cross-Tenancy.
	The User that is entitled to administrate the Asset Manager may
	permit users of a subtenant who receive a service from you to
	directly access the Asset Manager in relation to the respective
	subtenant.
Agent Diagnostic	Use Agent Diagnostic to:
	Activate and deactivate Agent logfiles and to access them.
Upgrade	Use Upgrade to:
	Order available upgrades to your subscribed Services (e.g.
	increase Users or Agents).
	Get an overview of your requested and completed upgrades.
	Manage pending upgrade requests (authorized Users only).
Other Services as part of	Your subscription to MindAccess IoT Value Plan also includes
MindAccess IoT Value Plan	access and the use of other Services made available to you.
	Such Services may be subject to specific terms and conditions
	that are set out in the MindSphere Supplemental Terms. This
	includes e.g. Operations Insight. The MindSphere Supplemental
	Terms form part of your agreement with us.
	When we introduce new features, supplements, enhancements,
	capabilities or Services (e.g. that were not previously included
	with the subscription to your MindAccess IoT Value Plan but are
	added at no additional fee), we may make updates to the
	MindSphere Supplemental Terms that apply to your use of these
	new features, supplements, enhancements, capabilities or
	Services.
	Please review the MindSphere Supplemental Terms before using
	a Service that is not described in this Product Sheet.

4. Security Information for MindAccess IoT Value Plan

Item	Description
Access credentials	Authentication and authorization on User level based on user
	name and password.
General	In order to protect plants, systems, machines and networks
	against cyber threats, it is necessary that you implement – and
	continuously maintain – a holistic, state-of-the-art industrial
	security concept.

v1.8 (Oct. 21) Page 7 of 10

5. Export Control Regulations for MindAccess IoT Value Plan

Item	Description
AL	N
ECCN	N

6. Definitions for MindAccess IoT Value Plan

Item	Description
Asset	An asset is the logical representation of a thing which can be a
	machine or an automation system with a single or multiple
	automation unit(s) e.g. PLC or even a factory site. Assets are
	defined using an asset type.
Asset type	Asset type describes the type of an asset (e.g. a generic motor)
	including one or several attributes. An asset type is a template
	that describes the attributes of a homogenous group of physical
	or logical assets, which is used for asset modeling.
	An asset type is a grouping of assets with common
	characteristics that distinguish those assets as a group or class.
Asset instance	Asset instance reflects a physical and/or logical device within
	your Account, e.g. a specific motor within a factory would be an
	asset instance. Each instance belongs to an asset type.
Agent	An Agent is a software as part of a hardware device (e.g.
	MindConnect Nano) or in the form of an Application provided by
	Siemens or a Third Party which you connect to your Account and
	which can ingest data into your Account and send data to one or
	more asset instances. The number of Agents equals the number
	of parallel data ingest channels. The data points that are
	ingested into the Account are associated to asset instances.
Fleet Manager	Fleet Manager provides an overview of your assets configured in
	a respective Account, and allows you to search and filter for
	relevant assets based on various criteria. You can define rules in
	the Fleet Manager that monitor the data points of the respective
	assets and define resulting actions such as sending notifications
	or setting the status indication after the occurrence of an event
	set by you, e.g. if the data relating to a certain asset exceeds a
	threshold defined by you in the Fleet Manager.
MindSphere Launchpad	After the login into your Account, the Launchpad appears.
	Similar to a desktop on any common operating system (OS), the
	MindSphere Launchpad facilitates starting various assigned

v1.8 (Oct. 21) Page 9 of 10

applications. You may permit Users of Third Parties that receive
a service from you to access the MindSphere Launchpad for the
purpose of accessing and using Applications assigned by you to
such Third Party.
If you provide services to your customers, you must replace the
service and support information provided in the MindSphere
Launchpad with your companies' service and support
information.
With Operations Insight it is possible to explore performance and
condition of assets, products or lines in real time, to get full and
harmonized transparency and root cause of data from connected
assets, to calculate KPIs, to assign work orders within your team
and get automatically notified once the thresholds value is
violated.
Means an online store in the Alibaba marketplace operated by or
on behalf of Alibaba Cloud allowing you to market and/or sell
Operated Applications.
A subtenant is a certain limited resource of a tenant and
represents a subpart of your own real-world organization or the
real-world organization of a third party that receives a service
from you. It is also used to assign applications and access to
applications.
A tenant is a representation of a real-world organization. It
covers properties like users, data, assets, entities etc.
All other capitalized terms in this document shall have the
meaning given to them in the MindSphere Agreement.
